PREFACE

All praise and gratitude are due to Allah SWT for His abundant blessings and mercy, enabling the thesis can be completed properly. This thesis is written to fulfill one of the requirements for obtaining a Bachelor's degree from the Study Program of English for Business and Professional Communication, Department of Business Administration, Politeknik Negeri Jakarta. The writer realizes that the process of writing this thesis would not have gone smoothly without the help, support, and guidance from many parties. Therefore, with great respect, the writer would like to express her sincere gratitude to:

- 1) Dr. Wahyudi Utomo, S.Sos., M.Si as the Head of the Business Administration Department;
- 2) Dr. Dra. Ina Sukaesih, Dipl. TESOL., M.M., M.Hum., as the Head of English for Business and Professional Communication Study Program;
- 3) Dr. Tantri Sari Safitry, S.Pd.., M.Pd, and Fanny Puji Rakhmi, S.Hum. M.Hum., as the supervisors who has provided time, energy, and thoughts to guide and support the writer while preparing this thesis and for the motivation during times of difficulty and challenges throughout the process;
- 4) The raters, Dra. Lenny Brida, Dipl. TESOL, M.Psi. M. Hum and product users who are willing to provide time and help the writer complete this thesis;
- 5) The researcher's parents for their unwavering love, prayers, support, and sacrifices throughout the educational journey and the completion of this thesis. Although father could not accompany until the end, the researcher firmly believes that he would always be proud of this achievement;
- 6) The researcher's friends in BISPRO Class of 2025, thank you for your support, friendship, and shared enthusiasm have been invaluable;
- 7) The researcher's closest friends, Nabil, Nayla, Maman, Riska, Rahma, Fauzan, and Devi, thank you for always being there and making the journey memorable;
- 8) A special shoutout goes to the members of Petidang, Medissa, Najla, Aichah, and Aufa, thank you for your constant motivation and support.

ABSTRACT

Cut Keisya Rahma Kirana. English For Business and Professional Communication Study Program. Analysis Of Translation Techniques and Readability on Noun Phrases in The Somethine Website in the "Calm Down!" Product Series.

This study employs a qualitative descriptive method aimed at identifying the types of noun phrases used in the product descriptions of the "Calm Down!" series on the Somethinc website, analyzing the translation techniques applied, and evaluating the readability of the translations. The classification of noun phrases refers to the theory by Widjono (2005), while the analysis of translation techniques uses Molina and Albir's (2002) framework of 18 techniques. The quality of the translation, particularly in terms of readability, was assessed through a Focus Group Discussion (FGD) with raters, using the parameters adapted from Nababan et al. (2010). The findings analyzed using Spradley's (1980) model revealed 144 data points of noun phrases, categorized into three main types: modificative, coordinative, and appositive. Modificative noun phrases were found to be the most dominant, with 76 data points. Of the 18 translation techniques, 7 techniques were identified as being used, with pure borrowing being the most frequently applied technique, found in 53 data points. The average readability score was 2.6, indicating that the product descriptions are relatively easy to understand for the users. The results of this study contribute to a deeper understanding of the use of noun phrases, translation techniques, and readability levels in skincare product descriptions. This study emphasizes the importance of retaining terms that are already familiar to consumers, ensuring that the information presented is concise, clear, and easy to comprehend for product users.

Keywords: noun phrase, translation techniques, readability, beauty product descriptions, website.

ABSTRAK

Cut Keisya Rahma Kirana. *Program Studi Bahasa Inggris untuk Komunikasi Bisnis dan Profesional*. Analysis Of Translation Techniques and Readability on Noun Phrases in The Somethinc Website in the "*Calm Down!*" Product Series.

Penelitian ini menggunakan metode deskriptif kualitatif yang bertujuan untuk mengidentifikasi jenis-jenis frasa nomina dalam deskripsi produk seri "Calm Down!" pada situs Somethinc, menganalisis teknik penerjemahan yang digunakan, serta menilai keterbacaan hasil terjemahan tersebut. Pengklasifikasian frasa nomina mengacu pada teori Widjono (2005), sementara analisis teknik penerjemahan menggunakan kerangka teori Molina dan Albir (2002) yang mencakup 18 teknik. Penilaian kualitas terjemahan, khususnya dari segi keterbacaan, dilakukan melalui diskusi kelompok terarah (FGD) bersama para penilai, dengan parameter yang diadaptasi dari Nababan, dkk. (2010). Hasil penelitian yang dianalisis dengan model Spradley (1980) mengungkapkan 144 data frasa nomina, yang terdiri dari tiga jenis utama: modifikatif, koordinatif, dan apositif. Frasa nomina modifikatif menjadi jenis yang paling dominan, dengan total 76 data. Dari 18 teknik penerjemahan, terdapat 7 teknik yang digunakan, dengan pure borrowing menjadi teknik yang paling sering diterapkan, yaitu pada 53 data. Nilai rata-rata keterbacaan yang diperoleh adalah 2,6, menunjukkan bahwa deskripsi produk ini relatif mudah dipahami oleh pengguna. Hasil penelitian ini berkontribusi pada pemahaman tentang penggunaan frasa nomina, teknik penerjemahan, dan tingkat keterbacaan dalam deskripsi produk skincare. Penelitian ini menekankan pentingnya mempertahankan istilah-istilah yang sudah akrab bagi konsumen, sehingga informasi yang disajikan menjadi lebih ringkas, jelas, dan mudah dipahami oleh pengguna produk.

Kata kunci: frasa nomina, teknik penerjemahan, keterbacaan, deskripsi kecantikan, situs web.

CHAPTER I

INTRODUCTION

1.1 Background of the Research

Translation holds a vital role in communication, as it serves to transfer or convey messages from one language to another. It is not merely a process of linguistic substitution instead, it requires careful consideration of meaning, context, and cultural nuances. The primary responsibility of a translator is to accurately convey the intended message from the source language to the target language or audience, presenting the information in a clear, specific, and easily comprehensible manner that preserves the original meaning embedded in the source text.

In the beauty industry, particularly in skincare product marketing, the use of English in product descriptions serves a strategic function. This language is not only employed as a tool for cross-cultural communication but also plays a role in shaping perceptions of professionalism and global quality. As Crystal (2003) explains, English has become a lingua franca across various professional domains, including business and advertising, due to its wide usage and adaptability in diverse contexts. Piller (2001) further emphasizes that English terms are often associated with scientific credibility, technological advancement, and international standards, thus enhancing the product's market appeal and brand image in the eyes of consumers. Therefore, in the context of translation, the use of accurate and appealing English becomes a key factor in increasing product competitiveness in both international and cosmopolitan domestic markets.

The stylistic aspect of promotional language or copywriting in product description translation also plays a crucial role. Effective copywriting not only preserves the core message of the source text but also adapts it to suit the characteristics and expectations of the target audience. According to Danesi (2009), marketing language must attract, persuade, and prompt action; therefore, translation in this context should be not only informative but also communicative and persuasive. Thus, translating skincare product descriptions such as Somethinc Calm Down! Series into English requires semantic

łak Cipta

🔘 Hak Cipta milik Politeknik Negeri Jakarta

accuracy, fluency, and rhetorical strength to support the brand's positioning strategy and market competitiveness on a global scale.

According to Newmark (1988), translation is the process of transferring meaning from the source language to the target language while preserving the core message. In the realm of technical translation, Nida and Taber (1982) emphasize that the quality of a translation should be evaluated based on three essential aspects: accuracy, acceptability, and readability. Meanwhile, Baker (2011) adds that in technical translation, the selection of equivalent terms must take into account the specific context and adhere to the terminological conventions of the relevant field to ensure that the message remains accurate and free from semantic distortion. Technical texts such as reports, product descriptions, or professional documents often contain specialized terms that demand a high level of precision in their translation. The main challenge for translators lies in rendering these technical terms or phrases accurately while also ensuring that the translated content is easily comprehensible to the target audience. This requires careful adjustment to the context and linguistic norms of the target language.

Amid globalization and the growth of the digital industry, the need for high-quality translations has become increasingly critical for companies seeking to reach global markets. A failure to deliver accurate translations can lead not only to misunderstandings but also to a damaged brand reputation. Therefore, translated texts must not only convey the intended meaning accurately but also be acceptable and easily understood by readers across different cultural backgrounds. Based on the perspectives of these scholars, it can be concluded that technical translation involves more than just word-for-word transfer; it requires the adaptation of meaning, style, and terminology in alignment with communicative purposes and usage context. Hence, it is crucial to analyze the translation techniques employed in technical texts and their impact on translation quality, particularly in terms of readability.

One of the sectors that heavily relies on translation quality is the beauty industry. Skincare and cosmetic products often include technical terms, active ingredients, usage instructions, and benefit claims that must be translated accurately in order to attract

lak Cipta

🔘 Hak Cipta milik Politeknik Negeri Jakarta

consumer interest. Among the various linguistic forms used, noun phrases are the most frequently found in product descriptions. A noun phrase is a grammatical unit centered around a noun and can be expanded with other elements such as adjectives or prepositional phrases. Noun phrases are more dominant than other types of phrases due to their compact, efficient, and direct function in conveying information. This type of phrase is capable of summarizing important information such as active ingredients, functions, and product forms within a concise sentence structure, as seen in examples like *PHA 3% Soothing Toner* or *Skinpair Barrier Serum*. This structure supports communication needs in marketing texts because it is both flexible and informative. Unlike verbal clauses, noun phrases tend to be more stable in meaning and easier to combine with visual strategies in product campaigns.

However, the dominance of noun phrases in descriptive texts also presents challenges in the translation process. Translators must consider how to preserve both the technical meaning and persuasive function of these phrases. A too literal translation may sound rigid or unattractive, while an overly free translation may obscure important scientific meanings or product claims. This challenge becomes even more complex in the global market, where product descriptions must remain appealing, accurate, and easy to understand for audiences from diverse cultural backgrounds. As stated by Nida (1964), a lack of clarity in conveying technical messages can reduce communication effectiveness.

A relevant case study is the product description of the *Calm Down!* series by Somethinc a rapidly growing local skincare brand in Indonesia. The products in this series, such as *Skinpair Barrier Serum*, *PHA 3% Soothing Toner*, and *Skinpair R-Cover Cream*, use noun phrases that combine scientific terminology with promotional language. Therefore, translating these phrases requires precision to preserve meaning and readability. In a global context, this is essential to ensure the product message is not misunderstood by international consumers.

Considering these factors, noun phrases in skincare product descriptions serve a vital function, both linguistically and strategically. The dominance of these phrases is not without reason; they are capable of conveying technical and promotional information efficiently. However, the translation process of noun phrases must also be examined

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber :

lak Cipta

Hak Cipta milik Politeknik Negeri Jakarta

critically, as it directly involves the choice of equivalent terms, sentence structure, and readability. Therefore, it is essential to analyze the translation techniques used and evaluate their impact on translation quality, particularly in the context of business communication and international product marketing.

The selection of the *Calm Down!* product series as the object of this research is based on its significant position in Indonesia's beauty market. According to data from YCP Holdings, the skincare sector accounts for approximately 30% of the total beauty industry in Indonesia. Within this category, Somethinc emerged as one of the leading local brands, having captured more than half of the domestic skincare market share in 2022, primarily through the use of digital platforms such as e-commerce and social media. This achievement is strongly supported by an effective brand communication strategy, including the use of English as the main language for product naming and descriptions. English is perceived to enhance a modern and professional image while also strengthening the brand's appeal in the global market.

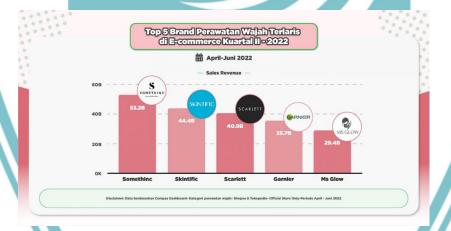

Figure 1.1 Top 5 Best Selling Skincare Brands on E-Commerce in 2022 (Source: https://manajemen.umsida.ac.id/membangun-brand-image-dalam-penjualan/)

Somethinc strategically targets young consumers, particularly millennials and Gen Z, who are familiar with digital developments, have wide access to global information, and tend to choose products with an international image. This age group is also accustomed to English terminology, especially in the skincare field, due to exposure to social media, beauty influencers, and global trends. Therefore, the use of English noun phrases in product

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber :

Hak Cipta:

🔘 Hak Cipta milik Politeknik Negeri Jakarta

descriptions not only reflects global industry standards but is also tailored to meet the needs and expectations of the target market.

Based on these considerations, the process of translating product descriptions whether from English to Indonesian requires careful attention. Poor translation quality, such as semantic inaccuracies or contextual mismatches, may reduce the effectiveness of the message, confuse consumers, or even harm the brand's image. Thus, the quality of translation particularly in crucial linguistic elements such as noun phrasesplays an essential role in delivering accurate and engaging product information, while also supporting effective cross-cultural communication.

Figure 1.2 Calm Down! Series Products

The Calm Down! Series consists of four products: 1) Calm Down! Skinpair Bubble Cleanser, 2) Calm Down! PHA 3% Soothing Everyday Toner, 3) Calm Down! Skinpair Barrier Serum, and 4) Calm Down! Skinpair R-Cover Cream. These four products are accompanied by detailed descriptions that contain a variety of technical noun phrases, including terms from chemical, dermatological, and cosmetic fields. Examples include phrases such as "PHA 3%," "barrier-repairing," "pH-balanced," and "skin-soothing active." Accurate translation of these phrases is essential to ensure the information remains clear and trustworthy for an international audience.

łak Cipta

🔘 Hak Cipta milik Politeknik Negeri Jakarta

This research is supported by several previous studies that have emphasized the importance of accuracy and translation quality within the context of the beauty industry. Research conducted by Setyowati and Nugroho (2020) revealed that errors in translating technical terms can lead to consumer confusion, particularly in industries that rely heavily on clear information, such as beauty and pharmaceuticals. The research found that inaccurate translation of technical terms and noun phrases may cause misinterpretations regarding product benefits and usage instructions. Further support comes from research by Aji et al. (2020) in Analysis of Translation Used in Translating Usage Instruction of Beauty *Products*, which analyzed translation methods and techniques used in the instructions for beauty products. The research identified several translation errors that resulted in significant shifts in meaning, thereby highlighting the importance of applying appropriate translation methods and techniques to avoid information loss in product instructions. In addition, a research by Wijayanti (2021) found that the use of proper translation strategies can enhance consumer comprehension of product descriptions on e-commerce platforms. This research also emphasized that overly literal translations often produce unnatural and difficult-to-understand texts, underlining the necessity of contextual adaptation in translation to meet the expectations of the target audience.

In addition, several other studies have emphasized that effective translation strategies in the beauty industry can enhance a brand's credibility. Research by Hidayat and Pratiwi (2022) demonstrated that consistency in using technical terms aligned with international standards can help build consumer trust in a product. These findings are consistent with those of Larasati (2023) which stated that translations that do not meet industry standards can weaken a product's competitiveness in the international market.

The implementation of appropriate translation strategies is believed to strengthen a brand's image and credibility, considering that language plays a crucial role in shaping consumer perception. When product information is presented clearly, accurately, and professionally in a language that is understandable to the target audience, it reflects the company's technical competence, commitment to quality, and high credibility. In the beauty sector, where consumers often pay close attention to details regarding scientific claims, active ingredients, and safety aspects, linguistic clarity and precision are essential

lak Cipta

Hak Cipta milik Politeknik Negeri Jakarta

in building customer trust and loyalty. Therefore, translation strategy should not be regarded merely as a process of language transfer, but as an integral part of branding and brand positioning efforts in the market. Especially in the context of cross-cultural communication and global markets, the quality of translation reflects the overall effectiveness of a brand's communication. Consequently, the choice of appropriate translation techniques including in rendering technical terms such as noun phrases plays a vital role in maintaining credibility and reinforcing brand positioning amid the increasingly competitive beauty industry.

Based on the aforementioned issues and previous studies, this research aims to analyze the quality and readability of noun phrase translations found in product descriptions on the Somethinc website, specifically within the Calm Down! product series. Accordingly, the findings of this research are expected to contribute to the development of translation practices in the beauty industry, particularly in ensuring that translated product descriptions convey accurate and appealing information to a global audience.

1.2 Statement of the Problem

Based on the background explanation above, this research identifies several issues to be further examined, as follows:

- 1. What types of noun phrases are found in the product details on the Somethinc website, specifically in the "Calm Down!" product series?
- 2. What techniques are used to translate product details on the Somethinc website, specifically in the "Calm Down!" product series?
- 3. How is the level of readability of the translation of noun phrases in the product details on the Somethinc website, specifically in the "Calm Down!" product series?

1.3 Objectives of the Research

Based on the problem formulation above, the objectives of this research are as follows:

1. To classify the types of noun phrases found in the product details on the Somethinc website, specifically in the "Calm Down!" product series.

lak Cipta

🔘 Hak Cipta milik Politeknik Negeri Jakarta

2. To identify the translation techniques used in the product details on the Somethinc website, specifically in the "Calm Down!" product series.

3. To identify the level of readability of noun phrases in the product details on the Somethinc website, specifically in the "Calm Down!" product series.

1.4 Limitation of the Research

Based on the background and problem statement explained above, this research will analyze translation techniques and the quality of noun phrases on the Somethinc website, specifically in the *Calm Down!* product series. To ensure a more focused and manageable scope, this research will be limited to analyzing product details on the Somethinc website, specifically in the Calm Down! product series. The analysis will be conducted on the product details of *Calm Down!* series available on the Somethinc website, specifically for products produced in 2019.

1.5 Significance of the Research

1. Theoretical Significance

This research will contribute to the field of translation studies, particularly in the translation of noun phrases in the beauty industry. The findings of this research will provide insights into how noun phrases related to skincare are translated from Indonesian to English and how the quality of these translations is assessed.

2. Practical Significance

- a For researchers and future studies, this research can serve as a reference for technical translation, particularly in the beauty industry, which relies on clear and detailed product descriptions.
- b For translators, this research's findings guide translating noun phrases in the beauty industry, ensuring more accurate and contextually appropriate translations.
- c For readers, this research helps them understand the translation of noun phrases in the beauty industry, which can influence their perception and comprehension of a product.

Hak Cipta:

🔘 Hak Cipta milik Politeknik Negeri Jakarta

CHAPTER V

CONCLUSION AND SUGGESTIONS

5.1 Conclusion

Based on the findings of this research and the discussions conducted regarding noun phrases, translation techniques, and readability levels in the product descriptions of the "Calm Down" series on the Somethinc website, several conclusions based on the result and discussions in Chapter IV, it can be concluded that:

- a. The analysis of noun phrases found in the Calm Down! product descriptions on Somethinc's official website reveal three structural types based on Widjono's (2010) classification: modificative, coordinative, and appositive noun phrases. Among these, modificative noun phrases appear most frequently, indicating a clear preference for this structure in beauty product descriptions. This type of noun phrase proves to be effective in conveying product information in a concise and accessible manner. Its dominance also reflects a strategic choice in digital marketing communication, where readability and clarity are essential for engaging consumers quickly. Therefore, the use of modificative noun phrases plays a key role in enhancing both the linguistic quality and promotional impact of translated product descriptions.
- b. In the translation of noun phrases found in the product descriptions of the Calm Down! series on Somethine's official website, seven translation techniques are identified based on Molina and Albir's (2002) framework: Pure Borrowing, Established Equivalent, Literal Translation, Amplification, Transposition, Reduction, and Naturalized Borrowing. Among these, Pure Borrowing emerges as the most frequently used technique. Its high frequency is closely related to the prevalence of technical terms and product names that lack precise equivalents in the target language. Attempts to translate these terms literally or through adaptation may risk distorting meaning or obscuring product identity. Therefore, retaining the original form of such terms is considered the most effective strategy to ensure both

l. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber :

Jak Cinta

🔘 Hak Cipta milik Politeknik Negeri Jakarta

accuracy and acceptability, particularly within the context of beauty product promotion.

- c. Based on the data analysis and the results of the Focus Group Discussion (FGD) with the evaluators, it can be concluded that the readability quality of the translated noun phrases is generally high. This is reflected in the average readability score of 2.7 out of a maximum of 3, indicating that most noun phrases are easily understood by readers without the need for rereading. Although a few phrases are considered less optimal in terms of fluency or clarity, the overall messages remain comprehensible and well-received. Therefore, the translation of noun phrases in the product descriptions of Somethinc's Calm Down! series can be categorized as having a good level of readability, which supports effective communication in the context of product promotion.
- d. The results of the analysis show that the choice of translation techniques significantly affects the level of accuracy for each type of noun phrase found in the product descriptions of Somethine's Calm Down! series. The pure borrowing technique proves to yield the highest accuracy, particularly for technical terms and brand names. In addition, established equivalent and literal translation techniques also demonstrate strong performance in maintaining semantic equivalence. Therefore, techniques such as amplification, transposition, reduction, and naturalized borrowing tend to produce lower levels of accuracy. On the other hand, in terms of readability, most techniques still produce positive outcomes, except for amplification, which is rated as having the lowest readability. These findings indicate that the appropriate application of translation techniques impacts not only the accuracy of meaning but also the ease of understanding for consumers, which is a crucial aspect in the translation of product descriptions.

5.2 Suggestions

Based on the conclusions presented earlier, the researcher would like to offer several recommendations that may be useful for translators or academics as material for further research. These recommendations include the following points:

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber :

łak Cipta

🔘 Hak Cipta milik Politeknik Negeri Jakarta

- a. This research is limited to the product descriptions of the "Calm Down" series from Somethinc. Therefore, it is recommended that future studies also explore other product series within the same brand or in other skincare brands in order to provide a more comprehensive overview regarding the use of noun phrases, translation techniques, and readability levels.
- b. Based on the results of this research and discussion, the overall readability level is considered good, although there are still some data that are rated as less easy to understand. Therefore, future research may investigate the specific causes of this lower readability and conduct further studies on other aspects of translation quality, such as accuracy and acceptability.

CURRICULUM VIRTAE

Cut Keisya Rahma Kirana

Jakarta, Indonesia

cut.keisya.rahma.kirana.an21@mhsw.pnj.ac.id.

I am a graduate with a Bachelor's degree in **English Linguistics for Business and Professional** Communication from Politeknik Negeri Jakarta. My academic background has equipped me with strong abilities in both communication and writing, as well as a solid grasp of translation and language use, which has sparked my interest in the fields of public relations and marketing.

During my studies, I engaged in several organizational activities and projects, such as translating legal texts and attending international seminars. I also completed an internship at PT Mandiri Karya Reswara, where I was involved in document translation tasks. With a detail-oriented mindset and a creative perspective, I strive to produce excellent outcomes in every assignment.
