### PREFACE

Praise be to the God, for his blessing and mercy that the researcher may complete this Thesis in a timely manner. The Thesis is conducted in order to meet one of the requirements for obtaining the title of Bachelor's degree. The researcher realized that, with assistance and guidance from various parties during the preparation process, the preparation of this Thesis would be easier to complete. Therefore, the researcher expresses her gratitude to:

- 1. Dr. SC. Zainal Nur Arifin, Dipl. Ing-HTL., M.T., as Director of the Politeknik Negeri Jakarta;
- 2. Dr. Dra. Iis Mariam, M.Si., as Chairperson of Business Administration Department;
- 3. Dr. Ina Sukaesih, Dipl. TESOL, M.M., M.Hum., as Head of English for **Business and Professional Communication Study Program**
- 4. Dr. Dra. Lenny Brida, Dipl. TESOL, M.Psi., M.Hum as an Advisor 1 who has assisted and guided the researcher to complete the Thesis.
- 5. Dr. Dra., Yogi Widiawati, M.Hum. as an Advisor 2 who has assisted and guided the researcher to complete the Thesis.
- 6. The raters, Anna Wiksmadhara, Dr. Dra. Lenny Brida, Dipl. TESOL, M.Psi., M.Hum, Asriadin M.said, Bayu okriansyah, who have kindly assessed the translation quality in this research.
- 7. The researcher's parents, who consistently provide moral and material support.
- 8. Sinta Agustin Rahmawati, who has always been supportive and helpful in assisting the writer in completing the thesis.

The researcher hopes that the results of this Thesis will be of great benefit to many parties. The researcher's final words extend her deepest gratitude to the parties involved and apologize for any deficiencies in the writing of this Thesis.

Jakarta, March 2023

### ABSTRACT

Adita Waranggani. English for Business and Professional Communication Study Program.

An Analysis Of Translation Quality And Techniques Of Noun Phrases On Bca

**Bank Financial Statements** 

This descriptive qualitative study aims to discuss the translation quality and translation techniques of noun phrases on BCA Bank financial statements. The translation technique adopted Molina & Albir theory (2002), and the translation quality adopted Nababan's assessment model. The results of this study are that the noun phrase constructions found in BCA Bank financial statements have 5 types, namely: (1) article + Premodification + core word; (2) article + Premodification + core word + prepositional phrase; (3) article + Premodification + core word + relative clause; (4) article + Premodification + core word + non-finite clause; and (5) uncategorized. This study found 5 translation techniques: establish equivalence, literal translation, reduction, borrowing, and amplification. Established equivalent is the most commonly used translation technique. In the event translation quality, accuracy aspect is 2.52 and acceptability is 2.65. This score showed that the translation results were judged to be relatively accurate and acceptable.

Keywords: Noun phrases, translation quality, translation techniques, BCA bank financial statements

NEGERI

JAKARTA

Adita Waranggani. Bahasa Inggris untuk Komunikasi Bisnis dan Profesional. An Analysis Of Translation Quality And Techniques Of Noun Phrases On Bca **Bank Financial Statements** 

Penelitian deskriptif kualitatif ini bertujuan untuk membahas kualitas terjemahan dan teknik penerjemahan frasa nomina pada laporan keuangan Bank BCA. Teknik penerjemahan menggunakan teori Molina & Albir (2002), dan kualitas terjemahan menggunakan model penilaian Nababan. Penelitian ini menunjukan bahwa konstruksi frasa nomina yang ditemukan dalam laporan keuangan Bank BCA ada 5 jenis, yaitu: (1) artikel + Premodifikasi + kata inti; (2) artikel + Premodifikasi + kata inti + frasa preposisional; (3) artikel + Premodifikasi + kata inti + klausa relatif; (4) artikel + Premodifikasi + kata inti + klausa tak tentu; dan (5) tidak berkategori. Lima teknik penerjemahan ditemukan: padanan lazim, penerjemahan harfiah, reduksi, peminjaman, dan amplifikasi. Padanan Iazim adalah teknik penerjemahan yang paling umum digunakan. Dalam hal kualitas terjemahan, aspek keakuratan adalah 2,52 dan keberterimaan adalah 2,65. Skor ini menunjukkan bahwa hasil terjemahan dinilai relatif akurat dan berterima.

Kata kunci: Frasa nomina, kualitas terjemahan, teknik penerjemahan, laporan keuangan bank BCA

### CHAPTER 1 INTRODUCTION

### 1.1 Background of The Study

A public company is a company whose capital can be owned by anybody, including the general public. In Indonesia, public firms are typically designated with the word Tbk, which signifies terbuka. The company releases all financial information to suit the information demands of stakeholders or the larger community, in addition to capital ownership, which can be owned by anyone. Financial statements, annual reports, and prospectuses all contain financial information. The Indonesia Stock Exchange and the company's official websites make it simple to view these documents.

Financial statements are presented in two languages, i.e. Indonesian and English, and translators play an important role in translating the financial statements in English. Translators do their duty to translate the financial statements to make it easier for stakeholders from other countries to understand the information presented in the financial statements. The translation of financial statements also ensures uniformity of communication in order that there is no misunderstanding of important information financial statements.

However, despite the critical role of translators, they sometimes make mistakes in translating the content of financial statements, which results in inaccurate and unacceptable translations. For example, in data number 89, i.e. Placement of financial assets amotized cost investments, the translator misspelt the word 'amotized' and it should be 'amortize'. Financial statements often use simple or complex phrases, which pose challenges during translation. Kridalaksana (2009:59), in his book entitled Kamus Lingustik, defines phrases as a combination of two or more words that are not predicative in nature. Phrases have several categories: noun phrases, verb phrases, adjective phrases, numeral phrases, prepositional phrases, and conjunction phrases.

This study uses noun phrases to analyse the translation quality and translation techniques of BCA bank financial statements. Noun phrases are chosen because financial statements contain a lot of noun phrases. Noun phrases have certain rules in their construction and differ from language to language. This is a hurdle when a translator wants to translate noun phrases from the source language (SL) to the target language (TL). Consequently, the translator must be able to translate the phrase accurately representing the meaning of the source language. In addition to being accurate, the translator must also translate the text acceptably or in accordance with the target language rules.

There are several previous studies related to translation in the financial field, such as the research conducted by Noviaty (2012) and Brida et al. (2021). The two studies both discuss financial statements. Noviaty (2012) discussed translation techniques to translate financial words from English to Indonesian discovered in the financial statements. Meanwhile, Brida et al. (2021) discussed the types and positions of verbs that have an adjective function. The difference between this study and the two studies is that Brida discussed verbs as a linguistics unit while this study discussed noun phrases, and Noviaty discussed the translation techniques. However, they did not examine translation quality. This research is not the new one but, there is no research that examines the construction of noun phrases on financial statements. The researcher chose noun phrases because noun phrases are the most widely used phrases in financial statements.

Financial statements are interesting to be analysed because the entire community or investors can read it. Before deciding to buy the public company's shares, they will read the financial statements first. This study will use BCA bank financial statements because BCA is one of the most frequently purchased stocks by investors and BCA bank is the company with the biggest market capitalisation in Indonesia. Therefore, the researcher is interested in examining the accuracy and acceptability of noun phrase translation in publicly listed companies' financial statements.

### 1.2 **Statements of The Problems**

To obtain study results that are arranged according to its objectives, it is necessary to formulate a problem. The formulation of the problems in this study are as follows:

- 1. What are the types of noun phrase constructions in the financial statements of BCA Bank Tbk.?
- 2. What techniques are used in translating the financial statements of BCA Bank Tbk.?
- 3. How accurate and acceptable are the translations of noun phrases in the financial statements of BCA Bank Tbk.?

### 1.3 **Objectives of The Study**

According to the research problems that have been discussed, the research objectives discussed above are:

- To identify the types of noun phrase constructions in the financial statements 1. of BCA Bank Tbk.
- 2. To identify what techniques are used in translating financial statements of BCA Bank Tbk.
- 3. To examine how accurate and acceptable the translation results of noun phrases in the financial statements of BCA Bank Tbk.

### **Limitations of The Study** 1.4

The limitation of the problem studied is the linguistic unit of noun phrases in the BCA Bank Tbk. financial statements. In addition, the translation quality is only limited to accuracy and acceptability. The two aspects are chosen because accuracy is crucial in order to maintain the integrity of financial data, as it ensures that the translated statements accurately represent the original information without any distortions or errors. On the other hand, acceptability ensures that the translation is not only accurate but also adheres to the linguistic and cultural norms of the target language, making it understandable and relevant to the intended audience. By considering both accuracy and acceptability, researchers can produce high-quality

. Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber :

a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penulisan laporan, penulisan kritik atau tinjauan suatu masalah.

Pengutipan tidak merugikan kepentingan yang wajar Politeknik Negeri Jakarta

translated financial statements that are reliable and culturally appropriate, enabling effective communication and decision-making in the financial domain.

### 1.5 **Significances of The Study**

- 1. Theoretically, this research is expected to contribute to the development of translation science, especially on noun phrases. Moreover, this research is also expected to increase knowledge about the techniques and quality aspects of translation accuracy and acceptability used in translation from English to Indonesian as well as its impact on meaning and understanding. By examining different translation techniques employed for noun phrase constructions, such as literal translation, establish equivalent, amplification, borrowing and reduction, this research aims to explain how these techniques affect the quality of translated texts.
- 2. Practically, this study is expected to contribute to the large body of knowledge, particularly from the perspective of linguistics. Besides, it is also expected to add to the knowledge of readers, especially using noun phrase translation techniques and recognize and know more deeply about the types of noun phrases. The findings of this research could be used as the material and example of teaching materials in linguistics units, especially noun phrase. This study is also expected to be a reference for further research examining the translation quality and translation techniques in financial

JAKARTA

statements.

### 5.1 Conclusions

Translation of noun phrases in the financial statements of BCA Bank is considered good when it exhibits high accuracy and acceptability. In this study, the researcher employed Quirk's et al. (1972) theory to determine the types of noun phrase constructions. Meanwhile, the researcher utilized a translation quality assessment model found by Nababan, Nuraeni, and Sumardiono (2012) to examine the accuracy and acceptability of translations. This research also employed Molina Albir Theory (2002) to analyse Translation Techniques. Based on the conducted Analysis, the following conclusions can be formulated.

- 1. From the 5 construction types, only 4 constructions were found and they were dominated by article + premodification + core word + prepositional phrase with 73 data or 72%. This is because financial statements often provide detailed information about various financial statements, such as assets, liabilities, revenues, and expenses. The addition of a prepositional phrase in this construction form allows for the inclusion of important details and specifications related to the core word.
- 2. From the 18 techniques found by Molina Albir (2002), researcher found 7 techniques used to translate bca bank's financial statements. The most frequently used translation technique is the established equivalent technique, which accounted for 102 data. This technique focuses on finding established and recognized equivalents in the TL that accurately convey the idea of the SL. It ensures consistency and familiarity for the readers of the translated financial statements.
- 3. Establish equivalent technique contributes in the case of accuracy and acceptability. The translation of noun phrases in BCA Bank's financial statements demonstrates a relatively high level of accuracy with an average score of 2.52. Despite its high accuracy, some shortcomings are identified, including less accurate and inaccurate translations. The percentage of accurate translations out of 102 data points is 70%. On the other hand, the

Hak Cipta

Dilarang mengutip sebagian atau seluruh karya tulis ini tanpa mencantumkan dan menyebutkan sumber : a. Pengutipan hanya untuk kepentingan pendidikan, penelitian, penulisan karya ilmiah, penulisan laporan, penulisan kritik atau tinjauan suatu masalah.

anpa izin Politeknik Negeri Jakarta

48

percentages for less accurate and inaccurate translations are 13% and 17%, respectively. The level of acceptability for the translation of noun phrases in BCA Bank's financial statements is also relatively high, with an average score of 2.65. The percentages of acceptable, less acceptable, and unacceptable translations out of 102 data points are 74%, 18%, and 8%, respectively.

### 5.2 **Suggestions for Further Research**

Further research is expected to focus on different linguistic units, such as verb phrases, adjective phrases, adverb phrases, and others. This would allow for comparing accuracy and acceptability in translating financial statements for each type of phrase. Additionally, future research is also expected to address the translation quality of noun phrases in financial statements with different sections, such as Significant Accounting Policies, Notes to the Financial Statements, Disclosure of Notes to the Financial Statements, or company prospectuses concerning other noun phrase constructions. Furthermore, future studies are encouraged to examine financial statements from different companies and sectors. This is considered necessary to identify whether there are significant differences in terms of quality, translation techniques, and accounting terminology used.
